

# WIRELESS BUSINESS GROUP, LLC (SYRACUSE, NEW YORK)

**Client: Upstate Hospital, Syracuse, New York**

**Project: Oversee/Coordinate an In-Building Solution for a newly expanded wing at the hospital**

In the fall of 2009 Upstate Hospital expanded its presence and commitment to the Syracuse community with the addition of new children's wing on the east side of the facility. However, a portion of the existing hospital and the expansion are built into the side of a hill resulting in limited radio coverage (cellular, fire, police) within the facility. The recommendation was made to invest in a neutral hosted DAS (Distributed Antenna System) which would propagate RF (Radio Frequency) throughout the affected areas. Based on our experience with in-building systems, WBG was hired to work on behalf of the Hospital...acting as a liaison between the wireless carriers, the approved in-building contractors and the customer.

**Solution:** WBG identified an in-building contractor, helped to pinpoint the exact frequencies required, provided a summary report of estimated costs and oversaw the project from start to finish.

At the Wireless Business Group, LLC, we work with corporate clients every day addressing a myriad of cellular-related projects.

From cell site work, to Blackberry training and support, to in-building installations, to bill management, we draw on our 30+ years of cellular experience to help our customers navigate through the complex world of cellular.

Since 2006, WBG has maintained a record of professionalism, quality work and reliability. With agent agreements with the four largest carriers, customers look to us for objective, industry-related information and guidance.
